

FRENCH GULCH / FERNAN HILL ROAD

Road Improvement Project

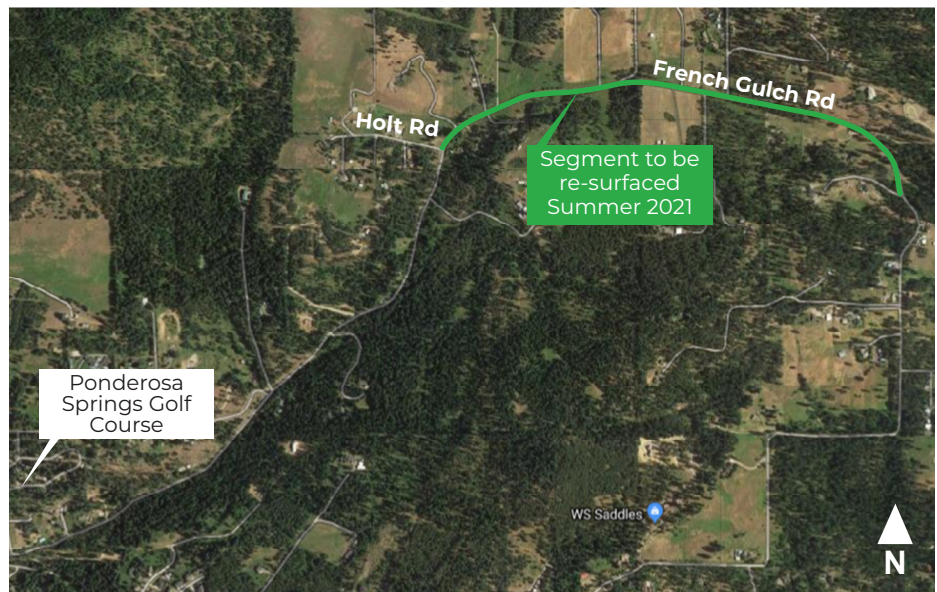

Project & Public Involvement Update

September 2020

ROAD RE-SURFACING NEWS: A segment of E French Gulch Road from Holt to one-mile east will be re-surfaced in Summer 2021. This project was programmed for 2025 construction, and is being advanced to 2021 with unused year-end Federal Funds! The project is to improve the roadway surface for the traveling public and local residents.

This Fall, East Side Highway District (ESHD) will prepare for the road re-surfacing with necessary **additional maintenance**. Residents can expect brush and tree removal, ditch preparation and culvert replacement. This work will require occasional travel delays and road closures. Watch for signage prior to road closures.

Thank you to those you came to the Project's Fall 2019 Open House. ESHD will have **additional public input opportunities** in Spring 2021 to continue conversations with the French Gulch and Fernan Hill community.
